

AI that puts enterprise knowledge to use

Unlock the power of your data. Draw insights. Take automation to another level.

Enterprise Knowledge & Automation

Part of MOZN AI Platform, the Enterprise Knowledge & Automation solution builds an intelligent brain for your organization by connecting your data, knowledge and context, enabling your people and agents to understand your organization, access its institutional memory and execute work.

/ WHAT IT DOES

Conversational intelligence over everything you know

Your teams ask questions in plain language and receive rich, insightful answers across structured and unstructured data, in seconds.

01	Access enterprise-wide knowledge	Search documents, knowledge bases, and internal systems across the organization	Research large volumes of PDFs, Word docs, emails, or reports across repositories	Secure confidential data with RBAC and tenant isolation
02	Chat with your documents	Ask questions about a single document or reams of them, in Arabic or English	Summarize or compare documents; extract clauses and tables	Generate executive briefs with evidence-backed, audit-ready answers
03	Chat with your databases	Query any data source (Postgres, Oracle, Snowflake, BigQuery, etc.) in Arabic or English	Build interactive dashboards, analyze trends, and compare metrics over time	Schedule re-runs of your analysis so you have it all ready each time you need it
04	Automate through Agentic Workflows	Automate knowledge-driven workflows across enterprise knowledge	Trigger follow-up workflows from events or queries	Run compliance checks and orchestrate tasks across your tech stack

< Why Choose MOZN AI Platform >

Sovereign by Design

Purpose-built for sovereign AI deployments in high-assurance environments.

Enterprise AI

End-to-end coverage of the enterprise AI lifecycle.

Arabic First

In-house Arabic NLP and OCR designed to run with sovereign Arabic models or any model of your choice.

Context Optimized AI Architecture

A modular architecture using specialized models.

Local Implementation & Support

Arabic-speaking AI experts embedded into teams for enterprise-wide AI operationalization.

Enterprise Data Unification

Connects across structured and unstructured enterprise data sources.

Proven Impact

99%

reduction in time spent finding the right data

<10 Secs

to uncover insights that previously took days

1 M+

documents processed and indexed in a single instance

Gives insights not just answers

MOZN AI Platform maps your data into a connected knowledge graph, understanding the entities, relationships, and context behind your information, not just keywords. The result is intelligence that reasons across silos giving you the macro as well as the micro picture. Finally, feed these insights to your AI Agents and workflows to transform the output.

Let MOZN AI Platform **unlock the power of your data.**

About Us

MOZN is an enterprise AI company empowering financial institutions and government organizations with intelligence that matters. Purpose-built for high-assurance domains, MOZN delivers solutions for financial crime prevention, knowledge intelligence, and decision intelligence. Through its AI platform, MOZN combines sovereign AI capabilities, advanced AI products, and forward-deployed engineering expertise to connect data, generate intelligence, and drive measurable outcomes.

Headquartered in Riyadh, MOZN serves customers across the region and beyond, helping organizations solve complex challenges where trust, compliance, and security are non-negotiable.
